Quality Videoconferencing Solutions

Sales

Videoconference Solutions Inc. takes a consultative approach to provide videoconferencing technology integration of voice, video data and networking applications that enable your organization to meet at a distance, or internally in the most comfortable and cost effective way possible. Videoconference Solutions Inc. has ensured that only technically qualified personnel handle all project matters from start to finish.

Service - Regular Cleaning and Maintenance

Regular cleaning and maintenance of your equipment can prolong the life of your equipment. Systems are often overlooked in the day-to-day office cleaning procedure. Videoconference Solutions Inc. will come to your office and thoroughly clean all components of your system, inside and out. Our technician can also perform simple tasks such as replacing defective cables or moving equipment to a new location within your premise.

Our maintenance package includes:

- Cleaning television screens/monitors
- Cleaning cameras (housing and lenses)
- Cleaning stands
- Re-labeling cables
- Replacing defective cabling
- Changing batteries in remotes
- Cleaning peripherals, (microphone, remote, document camera, etc)
- Cleaning cooling fans

On-site Support

For high profile and technically complicated videoconferences you may need technical support that goes beyond the knowledge available within your organization. In these situations, Videoconference Solutions Inc. can provide a qualified technician to support you. Technicians are available on an hourly basis and can assist with setup, operation, integration and troubleshooting videoconference equipment.
